ENVIRONMENTAL ENGINEER

Duties and Responsibilities

This class of positions encompasses professional environmental engineering work of varying degrees of difficulty and responsibility. There are three Assignment Levels within this class of positions. All personnel perform related work. The following are typical assignments within this class of positions.

ASSIGNMENT LEVEL I

Under general supervision, performs responsible supervisory work, or difficult and responsible work in the field, office, or laboratory in environmental engineering.

Examples of Typical Tasks

Is section engineer in charge of a major environmental engineering section or the equivalent.

Plans, assigns, and reviews the work of subordinates, prepares progress reports, and may represent an agency in relations with City agencies, contractors and their representatives, consultants and the general public in matters relating to environmental engineering.

Engages in, or supervises the conduct of complex and important research, investigations, studies or examinations related to the environmental engineering functions or activities of a department or agency.

Prepares, or supervises the preparation of, the basic design plan, or significant and complex portions of the basic design plan, for major environmental engineering projects for the construction, remodeling, operation, maintenance or repair of public works, structures, grounds or installations.

Makes interpretive detail sketches or layouts of intricate or fundamental portions or aspects of the basic design plan for environmental engineering projects as proposed or adopted, and prepares maps, designs, plans, contract and working drawings, estimates, contract specifications, and other technical specifications.

Approves or supervises the design, inspection, construction, demolition and/or alteration of premises, installations or apparatus to insure compliance with contracts, drawings, specifications, codes, resolutions, statutes, rules and regulations.
